Total Microorganisms, minimum	80,000,000 CFU/lb*
(Lactobacillus plantarum, Bacillus subtilis, Lactobacillus Acidophilus, Enterococcus faecium, Bifidobacterium animalis)	

*Not recognized as an essential nutrient by the AAFCO Dog Food Nutrient Profile.

FEEDING SUGGESTIONS

Adult Dogs: The amount of food required each day will vary by breed, activity level, temperament, and climate, and should be adjusted accordingly using the chart below as a guide. In most cases, once-a-day feeding is sufficient. If your dog prefers twice-a-day feeding, feed 1/2 of the daily amount in the morning and the other 1/2 in the afternoon. If preferred, one part warm water can be added to three parts Star Pro® immediately before serving.

WEIGHT OF DOG

Up to 12 lb
12 - 25 lb
25 - 50 lb
50 - 75 lb
75 - 100 lb

Over 100 lb, add 1 cup for each 25 lb of weight.

DAILY AMOUNT*

Up to 1/2 cup
1/2 - 1 1/4 cups
1 1/4 - 2 1/4 cups
2 1/4 - 3 1/4 cups
3 1/4 - 4 cups

*One standard 8-oz measuring cup holds approx. 4 oz of food.

Puppies: Start puppies on moistened Star Pro® as soon as they begin to nibble on solid food (usually 3 to 5 weeks of age). While they continue nursing, keep moistened Star Pro® available at all times until fully weaned at 6 to 8 weeks of age. After weaning, Star Pro® may be fed moist or dry. Feed puppies up to 6 months of age all of the Star Pro® they can consume. If fed dry, Star Pro® may be kept before puppies at all times.

Gestation and Lactation: Consumption will vary; therefore, feed the amount required to maintain good body condition. Food may need to be available at all times.

Water: Provide a source of fresh, clean water at all times.

CAUTION: Changes in pet food should be made gradually. Pet food should be stored in a well-ventilated, dry area protected from rodents and insects. Pet food is perishable. Do not feed moldy or insect-infested pet food to animals as it may cause illness or death.
